Key Findings:

• Home & Kitchen is the leading revenue-generating category, followed by Sports and Fashion.

• The United States is the company's strongest market, generating the highest Profit and Revenue.

• Revenue and profit remained stable throughout the analysis period, indicating consistent business performance.

• The business maintained a healthy profit margin above 35% despite an average discount rate of 7.16%.

# Pricing Analysis

Price Sensitivity Analysis

Average Selling Price by Category

Average Price by Price Band

Profit Margin by Price Band

## Price Band:

| Price Band | Price Range (\$) |
|------------|------------------|
| Low        | < 30             |
| Medium     | 30 – 70          |
| High       | 70 – 120         |
| Premium    | ≥ 120            |

## Pricing Insights:

- Books drive the highest sales volume despite the lowest pricing.
- Electronics has the highest prices but have lower sales volume.
- Home & Kitchen and Sports achieve the best balance of price and demand.
- Premium products deliver the highest margins (87%).

# Discount Optimization Analysis

Orders - Orders Count by Discount Label

Average Order Value by Discount Level

Orders by Discount Level

Revenue & profit by Discount Level

Revenue (0% Discount)

\$2.06M

Profit (0% Discount)

\$732.98K

Average Discount

7.16%

## Key Findings:

- Orders without discounts generate the highest revenue and profit.
- Higher discounts do not increase order volume.
- Average order value remains stable across all discount levels.
- Current discount strategies may reduce profitability without driving growth.

## Recommendations:

- Reduce blanket discount campaigns.
- Focus discounts on specific products or categories.
- Test targeted promotions instead of store-wide discounts.
- Prioritize pricing optimization over discounting strategies.

## Key Findings:

- Although Home & kitchen category has highest revenue and profit, electronics has many top performing products.
- High-performing products consistently achieve strong revenue, profit, and healthy profit margins.
- Product profitability varies significantly within categories.
- Strong and weak performers exist across all categories.

## Recommendations:

- Review pricing and costs of low-profit products.
- Expand product lines that consistently achieve strong profit margins and revenue performance.
- Implement category-level pricing strategies rather than applying uniform pricing decisions across all products..
- Prioritize investment, inventory, and marketing for high-revenue, high-profit products.

**Key Findings:**

- A 10% Increase in price generates a proportional 10% increase in revenue.
- The same increase generates a 28.22% increase in profit.
- Profit is more sensitive to pricing changes than revenue.
- Moderate price increases may significantly improve profitability.
- Pricing decisions have a significant impact on profitability.

# Strategic Business Insights

|               |              |                 |                 |                      |                           |
|---------------|--------------|-----------------|-----------------|----------------------|---------------------------|
| Total Revenue | Total Profit | Profit Margin % | Best Price Band | Top Revenue Category | Optimal Discount Strategy |
| \$4.84M       | \$1.71M      | 35.43%          | Premium         | Home & Kitchen       | 0 %                       |

## Strategic Focus Areas:

### Pricing Strategy:

- Maintain Premium pricing, as it delivers the highest profit margin (87.28%).
- Test 5–10% price increases, as the What-If analysis projects higher revenue and profit.
- Use category-specific pricing instead of a single pricing strategy across all products.
- Increase prices for Home & Kitchen and Sports, where demand remains strong.

### Discount Strategy:

- Reduce unnecessary discounts, as 0% discounts generated the highest revenue and profit.
- Reserve 20% discounts only for slow-moving or seasonal products.
- Avoid discounts on Premium-priced products to protect margins.
- Use category-specific promotional strategies instead of store-wide campaigns.

### Product Strategy:

- Invest more in Home & Kitchen and Sports, which deliver strong revenue and profitability.
- Expand Electronics products, as they include many of the highest-performing individual products.
- Review low-profit products identified in the 'Products Requiring Attention' table.
- Increase inventory for Top 10 revenue-generating products.

### Revenue Growth Strategy:

- Focus marketing campaigns on Home & Kitchen and Sports to maximize revenue growth.
- Expand Electronics products, as they contain many of the highest-performing individual products.
- Promote the Top 10 revenue-generating products through targeted marketing campaigns.
- Increase inventory for top-performing products to avoid stock shortages and missed sales.

# Executive Recommendations & Business Impact

## Executive Summary:

This analysis identified opportunities to improve profitability through optimized pricing, targeted discount strategies, and product portfolio optimization. Home & Kitchen emerged as the highest revenue-generating category, while Electronics contained several of the highest-performing products. Premium pricing consistently delivered stronger profit margins, and blanket discounting showed limited business value. Implementing category-specific pricing and focusing on high-margin products can support sustainable revenue growth and improved profitability.

## Project Limitations:

- Customer demand elasticity was not modeled.
- Order quantities were assumed constant during price simulations.
- Competitor pricing data was unavailable.
- Shipping and operational cost changes were excluded.
- Recommendations are based on historical transaction data from 2020–2025.

## Conclusion:

This dashboard provides a data-driven framework for evaluating pricing strategies, optimizing discounts, improving product performance, and supporting informed business decisions through interactive analytics.

## Expected business impact:

- **Improve overall profitability** through optimized pricing strategies.
- **Strengthen profit margins** by maintaining Premium pricing where demand is stable.
- **Reduce unnecessary discount costs** through targeted promotional campaigns.
- **Improve product portfolio performance** by expanding high-performing products and reviewing low-profit products.
- **Enable faster, data-driven pricing decisions** using interactive dashboards and KPIs.
- **Establish a scalable pricing framework** for future pricing and profitability optimization.

## Recommended Action Plan

### Step 1

Review pricing strategy for each category

↓

### Step 2

Reduce blanket discount campaigns

↓

### Step 3

Optimize product portfolio

↓

### Step 4

Increase investment in high-performing products

↓

### Step 5

Monitor KPIs and review pricing quarterly
